

For Immediate Release

## Plato Gold Corp. Releases Latest Results from Nordeau Drill Program

**Toronto, February 14, 2007** - Plato Gold Corp. (**PGC: TSX-V**) is pleased to release assay results for three drill holes from the ongoing program at their Nordeau Project located near Val-d'or Quebec, optioned from Globex Mining Enterprises Inc. (**GMX-T, G1M Frankfurt, GLBXF Pink Sheets**). Highlights from these three holes of the program include drill hole PG06-07 wherein **10 metres (32.8 feet) grading 7.85 g/t (0.23 ounces per ton) Au including a 1.5 metre intersection grading 23.8 g/t Au** were intersected. Please refer to Table 1 for complete drill hole assays.

**Peter Karelse P.Geo**, Plato Gold's Project Manager commented on the results of the program stating: "The results from PG06-07 in conjunction with the results from holes PG06-01 (see Plato Press release Jan 15, 2007) and historic holes W90-09 and W90-09B within the identified Main Zone suggests that the exploration potential of the Main Zone at the Nordeau West Project area remain positive. This intersection provides additional validation for Plato Gold's concept of a steeply plunging higher grade mineralized shoot within the Main Zone. This shoot coincides with an interpreted flexure in the host Basalts."

To date the drilling has tentatively identified 4 mineralized zones on the Nordeau West project area. The results from the drilling of both historical and current of the 41 holes which influence the Main Zone indicate a suggested strike length of 400 metres and down dip extension of 750 metres and remains open along strike and down dip. The other zones which occur en-echelon to the Main Zone are not as clearly defined. Further modelling will attempt to define more clearly the zones outside of the Main zone. Assays from hole PG06-07 below the Main Zone suggest the presence of a new zone at depth.

Since commencement of drilling in October 2006 Plato Gold has completed 20 holes for a total of approximately 7000 metres in three separate areas at the Nordeau property. Drilling is currently progressing on PG06-21 a hole which will intersect the Main Mineralized zone approximately 120 metres above PG06-07. Assay results will be released as they become available.

Table 1

Hole Number		From	To	Interval	Assay Au(g/t)	
PG06-06		251	255.4	4.4	2.73	
PG06-06	incl	251	252.5	1.5	2.95

adequacy or accuracy of this news release.*

**Cautionary Statements**

*This news release report contains "forward-looking statements", within the meaning of the United States Private Securities Litigation Reform Act of 1995 and similar Canadian legislation, concerning the business, operations and financial performance and condition of Plato. Forward-looking statements include, but are not limited to, statements with respect to the benefits of the offering and option transaction. Generally, these forward-looking statements can be identified by the use of forward-looking terminology such as "plans", "expects" or "does not expect", "is expected", "budget", "scheduled", "estimates", "forecasts", "intends", "anticipates" or "does not anticipate", or "believes", or variations of such words and phrases or state that certain actions, events or results "may", "could", "would", "might" or "will be taken", "occur" or "be achieved". Forward-looking statements are based on the opinions and estimates of management as of the date such statements are made, and they are subject to known and unknown risks, uncertainties and other factors that may cause the actual results, level of activity, performance or achievements of Plato to be materially different from those expressed or implied by such forward-looking statements, including but not limited to risks related to: not realizing on the anticipated benefits from the transaction or not realizing on such anticipated benefits within the expected time frame; risks related to exploration; actual resource viability, and other risks of the mining industry. Although management of Plato has attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking statements, there may be other factors that cause results not to be as anticipated, estimated or intended. There can be no assurance that such statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements.*

*Accordingly, readers should not place undue reliance on forward-looking statements. Plato does not undertake to update any forward-looking statements that are incorporated by reference herein, except in accordance with applicable securities laws.*
