Quarterly Report for the six and three months ended June 30, 2014

This Management Discussion and Analysis (“**MD&A**”) has been prepared based on information available to Plato Gold Corp (the “**Company**”) as of August 26, 2014.

This MD&A provides analysis of the Company's financial results for the six and three months ended June 30, 2014. The following information should be read in conjunction with the accompanying unaudited financial statements and the notes to the unaudited financial statements for the six and three months ended June 30, 2014 and the audited financial statements and the related notes for the year ended December 31, 2013. The Company’s functional and reporting currency is the Canadian dollar.

The unaudited financial statements and related notes of the Company have been prepared in accordance with International Financial Reporting Standards (“**IFRS**”). Refer to the Notes of the June 30, 2014 unaudited financial statements for disclosure of the Company’s significant accounting policies.

The Company is publicly traded on the TSX Venture Exchange (TSX-V: **PGC**).

International Financial Reporting Standards

The Company’s unaudited financial statements for the quarter ending June 30, 2014 and the December 31, 2013 audited financial statements have been prepared in accordance with IFRS as published by the International Accounting Standards Board.

Forward Looking Statements

This MD&A includes certain statements that may be deemed "forward-looking statements". All statements in this discussion, other than statements of historical facts, that address exploration drilling, exploration activities and events or developments that the Company expects, are forward-looking statements. Although the Company believes the expectations expressed in such forward-looking statements are based on reasonable assumptions, such statements are not guarantees of future performance and actual results or developments may differ materially from those in the forward-looking statements. Factors that could cause actual results to differ materially from those in forward-looking statements include exploration successes, continued availability of capital and financing and general economic, market or business conditions.

Investors are cautioned that any such statements are not guarantees of future performance and that actual results or developments may differ materially from those projected in the forward-looking statements.

Additional information including press releases have been filed electronically through the System for Electronic Document Analysis and Retrieval (“**SEDAR**”) and are available online under our profile at www.sedar.com or the Company’s website at www.platogold.com.

Neither this document nor the financial statements have been reviewed by the Company’s Auditors but they are subject to approval by the Company’s Board of Directors prior to filing and distribution to the shareholders.

Company Overview

Plato Gold Corp is a Canadian gold exploration company focused on prospective properties in recognized gold mining districts around the world including Santa Cruz, Argentina and Northern Ontario.

The Company was first listed on the TSX Venture Exchange (TSX-V: **PGC**) in 2005. Plato Gold Corp was formed as a result of a reverse takeover by its predecessor corporation, Plato Gold Corp of Shatheena Capital Corp., a capital pool company, and the subsequent amalgamation of Plato Gold Corp and Shatheena Capital Corp. Plato Gold Corp, the private company, was started in 1996.

The Company has two regionally based projects. The first project, the Lolita Project in Santa Cruz, Argentina, is comprised of a number of contiguous mineral rights totaling 27,857 hectares in Southern Argentina. As of August 9, 2011, Winnipeg Minerals S.A. (“WMSA”) was incorporated in Argentina with Plato Gold Corp holding 75% and Dr. P. Lhotka holding 25% of the outstanding shares. The mineral rights were subsequently transferred to WMSA as of November 14, 2011.

The second project is the Timmins Gold Project in Northern Ontario which includes four properties (Guibord, Harker, Holloway and Marriott) in what is sometimes referred to as the Harker/Holloway gold camp located east of Timmins.

Plato Gold Corp is in the early stage of exploration on both the Argentina and Ontario projects.

Second Quarter 2014 Highlights

In the second quarter of 2014:

- The Company is monitoring its assets in the Timmins Gold Project in northern Ontario.

- The Company continued to secure financing to advance the geological work on the Lolita Property in Santa Cruz, Argentina.

Overall Performance

On the Consolidated Statements of Financial Position, total assets increased to \$1,611,713 compared to \$1,606,348 as at December 31, 2013. The increase is minor and mainly due to increase in portfolio investments, a non-cash item, for the six months ended June 30, 2014.

Cash decreased to \$5,191 from \$5,670 at December 31, 2013 mostly as a result of cash from the related party offset by payments for on going operations of the company and nominal exploration expenditures during the period. The receivables increased to \$161,467 compared to \$161,140 at December 31, 2013, due to regular GST and QST rebates.

Deposits and prepaid expenses represent advances for exploration work and normal operations of the Company. Portfolio investments of \$75,077 a non-cash increase from \$70,231 at December 31, 2013, represents the market value of shares held as a result of shares acquired from the sale of claims.

On the liabilities side, accounts payable and accrued liabilities increased to \$506,956 from \$427,237 at December 31, 2013 representing the normal outstanding payables for professional fees such as accounting, auditing, legal, and consulting, as well as normal payables related to the Company's activities.

Due to related party is increased to \$424,700 from \$313,500 at December 31, 2013 as a result of the funds advanced during the six months made by a related corporation.

Total liabilities increased to \$931,656 at June 30, 2014 compared to \$740,737 at December 31, 2013 as a result of increases in accounts payable and due to related party.

Shareholders' equity decreased to \$668,592 from \$854,146 during the six months ended June 30, 2014 as a result of net loss for the period with no increase in funds during the period.

On the Consolidated Statements of Loss and Comprehensive Loss, the loss for the three months ending June 30, 2014 is mainly due to the normal cost of operations for the Company. Relative to the same period last year, the operating expenses decreased reflective of the reduced activities of the Company.

Income of \$518 was offset by \$93,862 of expenses compared to income of \$659 and 287,251 of expenses for the same period last year. Net loss and comprehensive loss for the three months of \$93,344 compared to \$286,592 for the same period last year.

On the Consolidated Statements of Cash Flow, cash used in operating activities was \$64,768 for the three months ended June 30, 2014, compared to \$35,315 for the same period last year. Cash provided by financing activities was \$65,700 for the three months ended June 30, 2014 compared to cash provided of \$nil in the same period last year. Cash used by investing activities was \$2,032 for the three months compared with cash used of \$65,494 in the same period last year.

Cash stood at \$5,191 as at June 30, 2014 compared to \$29,848 as at June 30, 2013.

Selected Annual Information

Unless otherwise noted, all currency amounts are stated in Canadian dollars.

The following selected financial data for each of the three most recently completed financial years are derived from the audited annual financial statements of the Company, which were prepared in accordance with International Financial Reporting Standards.

For the Years Ended December 31,	2013	2012	2011
	\$	\$	\$
Income	2,461	1,378	106,779
Net loss and comprehensive loss	743,705	3,735,370	558,277

The Company has recorded losses in all of the three most recently completed fiscal years and expects to continue to record losses until such time as the Company's projects are identified, developed and brought into profitable commercial operation.

Results of Operations

Exploration and Development Activities

Mineral property expenditures during the six months totaled \$3,116 compared to expenditures of \$32,021 for the same period in the previous fiscal year. Funding of projects was mainly from proceeds from optioning of claims and funds from related parties.

During the three months ended June 30, 2014 the Company was focused on raising funds to continue exploration work on the Company's two projects and to re-evaluate each of its projects based on results to date. In the coming year with the successful raising of funds, exploration work will be conducted on the Company's properties.

Lolita Project, Santa Cruz, Argentina

In 2007, Plato Gold successfully acquired, through a joint venture agreement, a majority interest in 29,000 hectares of strategically located property in Santa Cruz, Argentina. Plato holds a 75% interest in the joint venture with Dr. P. Lhotka holding the remaining 25% interest. The first three phases of work have involved prospecting, geochemical sampling as well as a Mag and IP survey over a large portion of the property.

The property is located in a geological metal rich province, hosted by Jurassic aged rocks of the Deseado Massif. The structures found to date are hosted by a felsite unit and felsic tuffs. To the immediate south significant base metal and precious metal vein systems occur and are held by some major Companies. The results to date have located a number of strong hydrothermal structures with chalcedonic silica, brecciation, iron oxides and pyrite with areas of weak to strong anomalous pathfinder elements of arsenic, antimony and mercury, which may be prospective for precious metals at deeper levels. Also encouraging is that these structures have been traced from 1 to 5 kilometers in length.

In light of these favourable results the Company followed up on Dr. P. Lhotka's recommendation by conducting a geophysical survey to locate and define specific targets within these surface defined structures for exploration by diamond drilling.

During the first quarter of 2011, the Company completed a Ground Magnetic Survey on the Lolita Property in Santa Cruz, Argentina, which was a prelude to an IP program and a planned drill program. In the Third quarter the Company completed the Ground Magnetic Survey and the IP program. The results of the IP program were announced on October 20, 2011.

On August 9, 2011, Winnipeg Minerals S.A. ("WMSA") was incorporated in Argentina with Plato Gold holding 75% and Dr. P. Lhotka holding 25% of the outstanding shares. The mineral claims totaling 27,857 hectares were subsequently transferred to WMSA as of November 14, 2011.

As of June 30, 2014, there were no changes to the share structure. The property is drill ready subject to available financing or an option agreement. As well, the Company continues to monitor the political environment in Argentina.

Timmins Gold Project, Ontario

On November 8, 2010 the Company signed an agreement granting St. Andrew Goldfields Limited (TSX: SAS) the option to earn a 75% interest in Plato's Timmins Gold Project, consisting of four properties in the Townships of Guibord, Harker, Holloway and Marriott.

The Company received an initial cash payment of \$100,000 upon execution of the agreement. The work commitments and cash payments for each property are graduated over a 4 year period. If a National Instrument 43-101 compliant mineral resource, whether measured, indicated or inferred of not less than 500,000 ounces of gold is discovered on any one of the four properties

while St. Andrew is earning its interest, St. Andrew will make a payment of \$1 million to the Company for each property reaching such milestones, giving a potential for \$4 million in milestone payments, as stated in the original option agreement. The option in respect of each property may be exercised or terminated separately by St. Andrew. St. Andrew is producing gold from its Holloway and Hislop mines.

As of February 2013, only the Holloway and Marriott properties are still in effect under the terms of the original option agreement.

In June 2013, the option agreement on these two properties was extended in exchange for 50,000 common shares of St. Andrew. Accordingly, the additional payment obligation, if a National Instrument 43-101 compliant mineral resource is identified in the remaining two properties, will be a potential of up to \$2 million in milestone payments.

An option payment of \$80,000 was received in November 2013 in accordance with the option agreement. St. Andrew is continuing their work on the properties.

As of June 30, 2014, the Holloway and Marriott properties are still in effect under the terms of the original option agreement and subsequent amendments.

Northern Gold Mining Inc.

On July 26, 2012, the Company announced that it had sold its 50% interest in the Guibord Property to Victory Gold Mines Inc. The 16 claims, known as the Guibord Property, will be owned 40% by Victory Gold and 10% by St. Andrew, with Plato retaining control of the remaining 50%. Plato received a payment of \$40,000 and 1,000,000 shares of Victory Gold.

In addition, Victory Gold has an option to own a 60% interest and St. Andrew to own a 15% interest in the Guibord Properties. If on or before the third anniversary of the agreement Victory Gold spends a minimum of \$700,000 in exploration expenditures on the property and Plato receives \$100,000 in cash or Victory Gold shares, at Plato's option. Final ownership would be represented by Victory Gold (60%), St. Andrew (15%) and Plato (25%).

If Victory Gold elects not to exercise the option, St. Andrew has an option to spend a minimum of \$200,000 in exploration expenditures on or before the third anniversary of the agreement and Plato receives from Victory Gold \$100,000 in cash or Victory Gold shares, at Plato's option. If completed, the final ownership in the Guibord property will be represented by Victory Gold (50%), St. Andrew (25%) and Plato (25%).

In 2013, Victory Gold Mines Inc. was amalgamated with Northern Gold Mining Inc. with the 1,000,000 shares of Victory Gold Mines Inc. held by the Company converted to 500,000 shares of Northern Gold Mining Inc.

On February 1, 2013 the Company announced that it had sold its 80% interest in the Harker Property to Northern Gold Mining Inc. and entered into a joint venture agreement with Northern

Gold Mining Inc. on the property for \$200,000 and 250,000 common shares of Northern Gold Mining Inc.

Following completion of the transaction, Plato will retain a 20% participating interest in the Harker Properties. If at any time either party's interest is reduced to 10% or less, such interest shall be surrendered and the forfeiting party shall be granted a one percent (1%) NSR from production on the Harker Properties. The non-forfeiting party shall have the right and option to purchase the entire 1% NSR for \$1,000,000.

The Company currently holds 925,000 shares of Northern Gold Mining Inc.

Administration

During the three months ended June 30, 2014, interest income of \$518 for the period was offset by administrative expenses and normal operating expenses resulting in a net loss before income taxes of \$93,344 for the three months compared to a loss of \$286,592 for the three months ended June 30, 2013. The loss per share was nil for basic and fully diluted for the three months ended June 30, 2014 and June 30, 2013.

Expenses during the three months totaled \$93,862 compared to \$287,251 for the comparable period in 2013. The decrease is mainly due to last year's unrealized gain on portfolio investment, a non-cash item, and a write-down of mineral properties. In general expenses are stable as noted in investor relations, publicity and advertising, office and general, professional fees, and rent, reflecting management's efforts to minimize expenses due to the reduced activities for the year.

As a junior gold exploration company, cash flow from financing will continue to be an ongoing focus for management. The current market conditions represent significant challenges to the entire junior exploration sector and there is no assurance that financing will be available in this market. We are maintaining a close watch on market activities as it relates to financing in our sector.

Summary of Quarterly Results

The following selected financial data are derived from the unaudited quarterly financial statements of the Company, which were prepared in accordance with International Financial Reporting Standards for the results from July 1, 2012 to June 30, 2014.

For the Quarters Ended	2014		2013				2012

Liquidity and Capital Resources

In management's view, given the nature of the Company's operations, which consist of the exploration of mining properties, the most relevant financial information relates primarily to current liquidity, solvency and planned exploration expenditures. In addition, the Company holds common shares in three publicly traded companies as reported in the accompanying audited financial statements. The Company's financial success will be dependent on the economic viability of the Lolita Project and the Timmins Gold Project.

The Company had cash of \$5,191 as of June 30, 2014 which is sufficient to cover the Company's short term cash requirements. As well, the Company has other receivables of \$161,467 consisting primarily of Quebec government exploration rebate anticipated to be received in 2014. Additional financing is required to finance on-going administration and continue the exploration activities of the Company.

As a gold exploration company, the Company generates minimal revenue, with the exception of government exploration rebate, and will have to return to the equity markets in order to secure additional financing for the Company to continue exploration. Management believes that it has the ability to raise sufficient funds for the continuation of operations. While management has been historically successful in raising the necessary capital, it cannot provide assurance that it will be able to obtain the required financing in light of the current economic conditions.

Changes in Accounting Policies

There have been no changes in accounting policies.

Financial Instruments

The Company's financial instruments consist of cash, portfolio investments, accounts payable and accrued liabilities.

Management does not believe these financial instruments expose the Company to any significant interest, currency or credit risks arising from these financial instruments. The fair market value of cash, portfolio investments, and accounts payable and accrued liabilities approximate their carrying values.

In conducting its business, the principal risks and uncertainties faced by the Company relate to exploration and development success. Exploration for gold involves significant risks, many of which are outside the Company's control. In addition to the normal and usual risks of exploration, the Company often works in remote locations that lack the benefit of infrastructure and easy access.

The Company relies on equity financing for its long term working capital requirements and to fund its exploration programs. There is no assurance that such financing will be available to the Company, or that it will be available on acceptable terms.

The President is a shareholder of both corporations. As at June 30, 2014, the amount due to related party was \$424,700.

Contractual Obligations and Commitments

Contractual obligations exist with respect to royalties however, gold production subject to royalty cannot be ascertained with certainty as the Company is still in the exploration stage with respect to its properties.

Internal Control over Financial Reporting and Disclosure Controls

Management, including the President and Chief Executive Officer (“CEO”) and the Chief Financial Officer (“CFO”), is responsible for designing, establishing, and maintaining a system of internal controls over financial reporting (“ICFR”) to provide reasonable assurance that all information prepared by the Company for external purposes is reliable and timely. Internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of the financial statements for external purposes in accordance with IFRS.

The Company’s internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately reflect the transactions of the Company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with IFRS, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company’s assets that could have a material effect on the Company’s Financial Statements. Due to its inherent limitations, internal control over financial reporting and disclosure may not prevent or detect all misstatements.

The CEO and CFO have evaluated whether there were changes to the ICFR during the three months ended June 30, 2014 that have materially affected, or are reasonably likely to materially affect, the ICFR. As a result, no such significant changes were identified through their evaluation.

There have been no material changes in the Company’s internal control over financial reporting during the three months ended June 30, 2014 that have materially affected, or are reasonably likely to materially affect, internal control over financial reporting.

Outlook

The Company's focus going forward will be on our Argentina property with the intent of moving to the next stage of exploration on the Lolita Project with a drill ready program subject to available financing or an option agreement.

In Ontario, the Company will monitor its option agreements with St. Andrew Goldfields Ltd. on its Timmins Properties, along with its interest on properties with Northern Gold Mining Inc.. As well, the Company will continue to identify other exploration activities and remains active in securing on going funding for the exploration projects.

Risk Factors

Readers of this Management Discussion and Analysis should give careful consideration to the information included or incorporated by reference in this document and the Corporation's unaudited financial statements and related notes for the period ended June 30, 2014. Significant risk factors for the Corporation are metal prices, government regulations, foreign operations, environmental compliance, dependence on management, claim renewals and performance of option agreements.

The Company has limited financial resources, has no source of operating income and has no assurance that additional funding will be available to it for further exploration and development of its projects. Although the Company has been successful in the past in financing its activities through the issuance of equity securities, there can be no assurance that it will be able to obtain sufficient financing in the future to execute its business plan.

a) Foreign Operations

The Company's Lolita project is currently conducted through a subsidiary located in Argentina and, as such, its operations are exposed to various levels of political, economic and other risks and uncertainties which could result in work stoppages of the Company's exploration activities. There is currently no local opposition to exploration activities, but there can be no assurance that such local opposition will not arise with respect to the Company's Argentina operations.

The Company's exploration and development activities are subject to extensive foreign federal, state and local laws and regulations governing such matters as environmental protection, management and use of toxic substances and explosives, management of natural resources, health, safety and labour, mining law reform, price controls import and export laws, taxation, maintenance of claims, tenure, government royalties and expropriation of property. There is no assurance that future changes in such regulations, if any, will not adversely affect the Company's activities.
