Plato Gold Corp.

Notes to the Financial Statements
For the Three Months Ended March 31, 2011
Unaudited - See Notice to Reader

1. Nature of Operations

Plato Gold Corp. (the "Company") is an Ontario corporation formed by amalgamation on May 30, 2005.

The Company is a public gold exploration company with three projects. The first project is the Timmins Gold Project in Northern Ontario which includes five properties (Guibord, Harker, Harker-Garrison, Holloway and Marriott) in what is sometimes referred to as the Harker/Holloway gold camp located east of Timmins. The second project, the Val d'Or Project in Northern Quebec, includes seven properties (Nordeau Bateman, Vauquelin, Vauquelin Pershing, Vauquelin Horseshoe, Pershing Denain, Hop O'My Thumb and Vauquelin II). The third project, the Lolita Project in Santa Cruz, Argentina, includes three adjoining concessions in Southern Argentina where active exploration activities are underway by other international exploration companies

The Company is in the process of exploring its mineral properties and has not yet determined whether its properties in Ontario and Argentina contain economic mineral reserves. Consequently, at March 31, 2011 the Company considers itself to be an exploration stage company with respect to these properties. The Company considers the Val d'Or Project to be in the advanced exploration stage with a 43-101 compliant resource.

The Company has not yet realized profitable operations and has incurred significant losses to date resulting in a cumulative deficit of \$3,997,339 as at March 31, 2011. The Company's continued existence is dependent upon its ability to raise additional capital and develop profitable operations. Management believes that it has the ability to raise the required additional funding. While management has been historically successful in raising the necessary capital, it cannot provide assurance that it will be able to execute on its business strategy or be successful in future financing activities. As at March 31, 2011, the Company had current assets of \$616,249 to cover current liabilities of \$839,670.

The financial statements do not reflect adjustments that would be necessary if the going concern assumption were not appropriate. If the going concern basis was not appropriate for these financial statements, then adjustments may be necessary in the carrying value of assets and liabilities and the balance sheet classifications used. These adjustments may be material

2. Basis of Presentation

In 2010 the CICA Handbook was revised to incorporate International Financial Reporting Standards ("IFRS"), and require publicly accountable enterprises to apply such standards effectively for years beginning on or after January 1, 2011. Accordingly, the Company has commenced reporting on this basis in these interim financial statements. In these interim financial statements, the term "Canadian GAAP" refers to Canadian GAAP before the adoption of IFRS. These interim financial statements do not conform in all respects with disclosures required for annual financial statements and should be read in conjunction with the Company's Canadian GAAP annual financial statements for the year ended December 31, 2010.

The Company's interim financial statements reflect the results of operations for the three month periods ended March 31, 2011 and 2010, and the assets, liabilities and shareholders' equity as at March 31, 2011, December 31, 2010, and January 1, 2010.

Plato Gold Corp.

Notes to the Financial Statements
For the Three Months Ended March 31, 2011
Unaudited - See Notice to Reader

2. Basis of Presentation (continued)

a) Statement of Compliance

The Company's interim financial statements have been prepared in accordance with IAS 34, Interim Financial Reporting ("IAS 34"). These are the Company's first IFRS interim financial statements in which IFRS 1, First-time Adoption of International Financial Reporting Standards ("IFRS 1") has been applied (note 4). The IAS 34 interim financial statements do not include all of the information required for annual financial statements.

The significant accounting policies (note 3) have been applied consistently to all periods presented in preparing the opening statement of financial position at January 1, 2010 (note 4) for the purposes of transitioning to IFRS.

The policies applied in the Company's interim financial statements are based on IFRS effective as of June 22, 2011, the date the Board of Directors approved the statements. Any subsequent changes to IFRS that are given effect in the Company's annual financial statements for the year ending December 31, 2011 could result in restatement of these interim financial statements, including the transition adjustments recognized on change-over to IFRS. (note 4)

b) Basis of Measurement

The Company's financial statements have been prepared on the historical cost basis.

c) Functional and Presentation Currency

The Company's functional currency is Canadian dollars and the interim financial statements are presented in Canadian dollars.

d) Use of Estimates

The preparation of the financial statements in conformity with IFRS requires management to make estimates and assumptions that affect assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of operations during the reporting period. Significant estimates and assumptions include those related to the recoverability of resource properties, valuation of options and warrants and the ability to continue as a going concern. While management believes that the estimates and assumptions are reasonable, actual results could differ from those estimates.

3. Significant Accounting Policies

The accounting policies set out below have been applied consistently to all periods presented in these interim financial statements and in preparing the opening IFRS statements of financial position at January 1, 2010 for the purpose of transitioning to IFRS, unless otherwise indicated.

Plato Gold Corp.

Notes to the Financial Statements
For the Three Months Ended March 31, 2011
Unaudited - See Notice to Reader

3. Significant Accounting Policies (continued)

a) Foreign Currency Transactions

The Company's interim financial statements are presented in Canadian dollars. Costs are primarily incurred in Canadian dollars. The Company incurs costs at its Lolita Project in Argentina primarily in US dollars. Although these transactions are in US dollars, the predominant currency is the Canadian dollar, and as such, it is also the Company's functional currency.

The Company translates monetary assets and liabilities at the rate of exchange in effect at the balance sheet date and non monetary assets and liabilities at historical exchange rates. Income and expenses are translated at average rates in the month they occur. Gains and losses on translation are recorded in the statement of operations.

b) Mineral Properties and Deferred Exploration Costs

The Company records its mineral exploration expenditures at cost. Acquisition costs of resource properties together with direct exploration expenditures thereon are deferred in the accounts. When production is attained, these costs will be amortized on a units-of-production basis. If the properties are abandoned, sold or considered to be impaired in value, the costs of the properties and related deferred expenses will be written down at that time. When deferred expenditures on individual producing properties exceed the estimated net realizable value of undiscounted proven reserves, the properties are written down to the estimated fair value.

The Company is in the process of exploring and evaluating its mineral properties and has not yet determined the amount of reserves available. Senior management regularly reviews the carrying amount of mineral properties and deferred exploration and development costs to assess whether there has been any impairment in value.

d) Property, Plant and Equipment

Property, plant and equipment are recorded at cost. Amortization is provided over the estimated useful lives of the assets using the declining-balance method at the following rates per annum:

Computer equipment	30%
Furniture and fixtures	30%

Additions during the year are amortized using the half year rule.

e) Flow-through Financing

The Company has financed a portion of its exploration activities through the issuance of flow-through shares, which transfer the tax deductibility of exploration expenditures to the investors. Proceeds received on the issuance of such shares have been credited to capital stock.

Plato Gold Corp.

Notes to the Financial Statements
For the Three Months Ended March 31, 2011
Unaudited - See Notice to Reader

3. Significant Accounting Policies (continued)

e) Flow-through Financing (continued)

The issue of flow through shares is in substance an issue of ordinary shares and the sale of tax deductions. The sale of tax deductions may be measured using either the residual method or the relative fair value method. At the time the flow through shares are issued, the sale of tax deductions is deferred and is presented as other liabilities in the statement of financial position, because the Company has not yet fulfilled its obligation to pass on the tax deductions to the investor. When the company fulfills its obligation:

- (i) the sale of tax deductions is recognized in the income statement as a reduction of the deferred tax expense; and
- (ii) a deferred tax liability is recognized, in accordance with IAS 12, Income Taxes, for the taxable temporary difference that arises from the difference between the carrying amount of eligible expenditures capitalized as an asset in the statement of financial position and its tax base.

The obligation is fulfilled when the eligible expenditures are incurred.

f) Income Taxes

The Company follows the asset and liability method of accounting for income taxes. Under this method, deferred income tax assets and liabilities are determined based on the differences between the carrying amount of assets and liabilities on the balance sheet and their corresponding tax value, using the substantively enacted tax rates expected to apply when these temporary differences are reversed. Deferred income tax assets are recorded to recognize tax benefits only to the extent that, based on available evidence, it is more likely than not that they will be realized. Income tax expense is recognized in profit or loss except to the extent that it relates to a business combination, or items recognized directly in equity.

g) Share-based Payments

The Company accounts for share-based payments using the fair value method. Under this method, compensation expense is measured at fair value on the date of grant using the Black-Scholes option pricing model, and is recognized as an expense or capitalized, depending on the nature of the grant, with a corresponding increase in equity, over the period that the options are earned. The Black-Scholes option pricing model requires the input of subjective assumptions, including the expected term of the option and stock price volatility.

Common share purchase warrants, stock options and other equity instruments issued as purchase consideration in non-cash transactions, other than as consideration for mineral property assets, are recorded at fair value determined by management using the Black-Scholes option pricing model. The fair value of the shares issued as purchase consideration for mineral property assets is based upon the trading price of those shares on the TSX-V on the date of the agreement to issue shares as determined by the Board of Directors.

Plato Gold Corp.

Notes to the Financial Statements
For the Three Months Ended March 31, 2011
Unaudited - See Notice to Reader

3. Significant Accounting Policies (continued)

h) Warrants

Proceeds from unit placements are allocated between shares and warrants issued according to their relative fair value.

i) Decommissioning Liabilities

The Company's exploration activities are subject to various governmental laws and regulations relating to the protection of the environment. These environmental regulations are continually changing and becoming more restrictive. The fair value of an obligation to incur restoration, rehabilitation and environmental costs is to be recognized when incurred and the corresponding increase to the asset is amortized over the life of the asset. The liability is increased over time to reflect an accretion element considered in the initial measurement at fair value.

As at March 31, 2011 the company has not incurred and is not committed to any decommissioning obligations in respect of its mineral exploration properties.

j) Loss Per Share

Loss per share is computed by dividing the loss for the year by the weighted average number of common shares outstanding during the year, including contingently issuable shares which are included when the conditions necessary for issuance have been met. Diluted loss per share is calculated in a similar manner, except that the weighted average number of common shares outstanding is increased to include potentially issuable common shares from the assumed exercise of common share purchase options and warrants, if dilutive. The number of additional shares included in the calculation is based on the treasury stock method for options and warrants.

k) Related Party Transactions

All transactions with related parties are in the normal course of business and are measured at the exchange amount.

l) Financial Instruments

IAS 39, Financial Instruments: Recognition and Measurement ("IAS 39") requires classification of financial instruments into one of four categories: financial assets of fair value through profit and loss, held-to-maturity investments, loans and receivables, and available-for-sale securities. The Company determines the classification of its financial assets and liabilities at initial recognition.

Plato Gold Corp.

Notes to the Financial Statements
For the Three Months Ended March 31, 2011
Unaudited - See Notice to Reader

3. Significant Accounting Policies (continued)

l) Financial Instruments (continued)

All of the Company's financial instruments are initially measured at fair value, with subsequent measurements dependent on the classification of each financial instrument. Financial assets at fair value through profit or loss include cash and cash equivalents which are measured at fair value and all gains and losses are included in net loss in the period in which they arise. Loans and receivables, which included receivables, are recorded at amortized cost. The Company does not have any financial assets classified as held-to-maturity or as available-for-sale. Other financial liabilities at amortized cost include accounts payable and accrued liabilities.

The Company's financial assets and liabilities recorded at fair value on the statement of financial position have been categorized into three categories based on a fair value hierarchy that reflects the significance of the inputs used in marking the measurements. The fair value hierarchy has the following levels:

Level 1 - valuation based on quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2 - valuation techniques based on inputs other than quoted prices included within Level 1 that are observable for the asset or liability either directly (ie as prices) or indirectly (ie as derived from prices);

Level 3 - valuation techniques using inputs for the asset and liability that are not based on observable market data (unobservable inputs).

Transaction costs are expensed as incurred for financial instruments classified as held for trading. For other financial instruments, transaction costs are capitalized on initial recognition.

m) Future Accounting Changes

IFRS 9 (Financial Instruments: Classification and Measurement), effective for annual periods beginning on or after January 1, 2013, with early adoption permitted, introduces new requirements for the classification and measurement of financial instruments. Management anticipates that this standard will be adopted in the Company's financial statements for the period beginning January 1, 2013 and has not yet determined the potential impact on the Company's financial statements.

Plato Gold Corp.

Notes to the Financial Statements
For the Three Months Ended March 31, 2011
Unaudited - See Notice to Reader

4. Transition to IFRS

a) First-time Adoption of IFRS

The adoption of IFRS requires the application of IFRS 1, which provides guidance for an entity's initial adoption of IFRS on the first date at which IFRS was applied, which was January 1, 2010 ("Transition Dates"). IFRS 1 generally requires retrospective application of IFRS as effective at the end of its first annual IFRS reporting period. However, IFRS 1 also provides certain optional exemptions and mandatory exceptions to this retrospective treatment.

IFRS 1 does not permit changes to estimates previously made. Accordingly, estimates used in the preparation of the Company's opening IFRS statements of financial position as at the Transition Date are consistent with those that were made under Canadian GAAP.

On the Transition Date, the Company has elected not to retrospectively apply IFRS 2, Share-based Payments ("IFRS 2") to all share-based transactions at the date of transition. IFRS 2 will only be applied to equity instruments issued on or after, and that have not vested by, the Transition Date.

The Company has elected not to retrospectively apply IFRS 3, Business Combinations. ("IFRS 3"). IFRS 3 will only be applied to business combinations occurring on or after the Transition Date.

While adoption of IFRS has not changed the Company's cash flows, it has resulted in changes to the Company's reported financial position and results of operations. In order to allow users of the financial statements to better understand these changes, the Company's Canadian GAAP statement of financial position and statement of operations have been reconciled to IFRS with the resulting differences explained.

Plato Gold Corp.

4. Transition to IFRS (continued)

The following summarizes the significant changes to the Company's accounting policies upon adoption of IFRS:

a) Impairment of (non-financial) assets

IFRS requires a write-down of assets if the higher of the fair market value and the value in use of a group of assets is less than its carrying value. Value in use is determined using discounted estimated future cash flows. Canadian GAAP requires a write-down to estimated value only if the undiscounted future cash flows of a group of assets are less than its carrying value.

The Company's accounting policies related to impairment of non-financial assets have been changed to reflect these differences. There is no impact on these interim financial statements or the opening statement of position at January 1, 2010.

b) Decommissioning liabilities

IFRS requires the recognition of a decommissioning liability for legal or constructive obligations, while Canadian GAAP requires the recognition of such liabilities for legal obligations. A constructive obligation exists when an entity has created reasonable expectations that it will take certain actions.

The Company's accounting policies related to decommissioning liabilities have been changed to reflect these differences. There is no impact on these interim financial statements or the opening statement of position at January 1, 2010.

c) Income taxes

A deferred tax liability is recognized in accordance with IAS 12, Income Taxes, for the taxable temporary difference that arises from the difference between the carrying amount of eligible expenditures capitalized as an asset in the statement of financial position and its tax base.

IAS 12 does not recognize a deferred tax liability or asset if it arises from initial recognition of an asset or liability outside a business combination and there is no impact in profit or loss at the time of the transaction. Under Canadian GAAP, the impact of deferred income taxes related to share issue costs was recognized directly in equity. Any subsequent changes affecting the deferred taxes in respect of the share issue costs were recognized in earnings. Under IFRS, deferred taxes recognized in respect of share issue costs are also recognized in equity. However IAS 12 requires subsequent changes in the deferred tax expense recognized in respect of share issue costs to be recognized in equity. This change in accounting policy resulted in a re-classification between deficit and share capital at January 1, 2010 of \$238,713.

The Company has also decreased its January 1, 2010 deficit by \$200,155 representing the temporary difference between the carrying amount of the eligible expenditures capitalized as an asset in the statement of financial position and its tax basis.

Plato Gold Corp.

Notes to the Financial Statements
For the Three Months Ended March 31, 2011

4. Transition to IFRS (continued)

d) Flow-through Shares

According to Canadian GAAP, the resource expenditure deduction for income tax purposes related to exploration activities funded by flow-through share arrangements are renounced to investors in accordance with tax legislation. The deferred income taxes relating to the temporary difference that arise when the qualifying expenditures are incurred were recorded at the time of filing the renunciation with the tax authorities. The recognition of the deferred income tax liability results in a corresponding reduction to the carrying value of the shares issued.

Under IFRS, the obligation to renounce tax deductions at the time of issuance of flow-through shares is recorded as a liability in accordance with IAS 37, Provisions, Contingent Liabilities and Contingent Assets, measured using a residual or fair value method. This obligation is released into the statement of operations as income when the Company incurs the qualifying expenditures.

A deferred tax liability is recognized in accordance with IAS 12, Income Taxes, in respect of the taxable temporary difference that arises from the difference between the carrying amount of eligible expenditures capitalized and the tax basis.

As a result of the changes from Canadian GAAP to IFRS, the Company has increased its January 1, 2010 deficit by \$245,430 reflecting the renounced tax deduction obligations that would have been released into the statement of operations under IFRS. The Company has also decreased its January 1, 2010 deficit by \$200,155 representing the temporary difference between the carrying amount of the eligible expenditures capitalized as an asset in the statement of financial position and its tax basis.

a) Timmins Gold Project

The Timmins Gold Project is comprised of five properties along the Destor-Porcupine Fault Zone located east of Timmins. The properties are comprised of 4 leases and 117 claims for a total of 2,416 hectares in the region. Four properties are subject to a 2% net smelter royalty to a former director of the Company. The other property is subject to a 2% net metal royalty to the former owner.

i) St Andrew Option

On November 8, 2010, the Company entered into an agreement granting St Andrew Goldfields Ltd. ("St Andrew") the option to earn a 75% interest in Plato's Timmins Gold Project consisting of four properties located in the Townships of Guibord, Harker, Holloway, and Marriott.

Plato received an initial payment of \$100,000 upon the execution of the option agreement.

With respect to the Holloway Property, to earn its 75% interest St Andrew will be required to incur exploration expenditures of \$100,000 on or before the first anniversary, \$200,000 on or before the second anniversary, and \$500,000 on or before the third anniversary of the effective date. As well, St Andrew will be required to make additional payments to Plato of \$20,000 on or before the first anniversary, \$40,000 on or before the second anniversary, and \$60,000 on or before the third anniversary of the effective date.

5. Mineral Properties and Deferred Exploration Costs (continued)

a) Timmins Gold Project (continued)

i) St Andrew Option (continued)

With respect to the Guibord Property, to earn its 75% interest St Andrew will be required to incur exploration expenditures of \$100,000 on or before the first anniversary, \$200,000 on or before the second anniversary, and \$500,000 on or before the third anniversary of the effective date. As well, St Andrew will be required to make additional payments to Plato of \$60,000 on or before the second anniversary, and \$60,000 on or before the third anniversary of the effective date.

With respect to the Harker Property, to earn its 75% interest St Andrew will be required to incur exploration expenditures of \$50,000 on or before the first anniversary, and \$250,000 on or before the second anniversary of the effective date. As well, St Andrew will be required to make additional payments to Plato of \$50,000 on or before the second anniversary of the effective date.

With respect to the Marriott Property, to earn its 75% interest St Andrew will be required to incur exploration expenditures of \$100,000 on or before the third anniversary, and \$200,000 on or before the fourth anniversary of the effective date. As well, St Andrew will be required to make additional payments to Plato of \$20,000 on or before the third anniversary, and \$30,000 on or before the fourth anniversary of the effective date.

In addition, if a National Instrument 43-101 compliant mineral resource, whether measured, indicated or inferred, of not less than 500,000 ounces of gold is discovered on any one of the four properties while St Andrew is earning its interest, St Andrew will make a payment of \$1 million to Plato for each property reaching such milestones. The additional payment obligation shall apply to each property independently of the other properties for a potential of up to \$4 million in milestone payments. The option in respect of each property may be exercised or terminated separately by St Andrew.

ii) Northern Gold Transaction

In May 2011, the Company entered into an agreement to sell a 100% interest in its 24 Harker Garrison Claims to Northern Gold Mining Inc. The 24 claims will be sold for a cash payment of \$72,000 and 175,00 shares of Northern Gold Mining Inc.

b) Val d'Or Project

The Val d'Or Project is comprised of seven properties located south east of Val d'Or, Quebec. The properties consist of 253 claims for a total of 4,390 hectares. Two properties with 82 claims are subject to a 2% net metal royalty. Another two properties with 21 claims are subject to a 2% net smelter royalty.

5. Mineral Properties and Deferred Exploration Costs (continued)

b) Val d'Or Project (continued)

i) Globex Option

As of March 31, 2010, the Company has made cash payments totalling \$575,000, with the remaining \$100,000 due by December 31, 2011, for a total cash payment of \$675,000.

As of March 31, 2010 and 2009, the Company has incurred exploration expenditures, in accordance with the terms of the agreement, of \$3,194,948 with \$1,500,000 due April 30, 2011 and \$1,500,000 due December 31, 2011, for total exploration expenditures of \$6,000,000.

As of March 31, 2010, the Company has issued 2,500,000 shares to Globex, with 500,000 shares due by December 31, 2011, for a total of 3,000,000 common shares. The bankable feasibility study is due by December 31, 2012.

On August 8, 2006, the Company entered into an option agreement with Globex Mining Enterprises Inc. ("Globex") to acquire a 100% interest in mineral claims known as the Nordeau East and Nordeau West Property in Vauquelin Township, Quebec, and a 60% interest in certain contiguous mineral claims known as the Bateman Claims in Vauquelin Township, Quebec ("Nordeau Bateman Properties").

As part of the original agreement, in order to acquire the interests in the Nordeau Bateman Properties, the Company agreed to pay Globex cash payments totalling \$500,000 by December 31, 2007, of which \$100,000 was paid on the effective date in 2006, \$100,000 due by December 31, 2006 and \$300,000 due by December 31, 2007. As well, the Company issued 1,000,000 common shares to Globex at a deemed price of \$0.16 per share on the effective date in 2006. Furthermore, the Company must incur exploration expenditures of \$6,000,000 by December 31, 2008, of which \$1,000,000 is due by December 31, 2006, \$2,000,000 due by December 31, 2007 and \$3,000,000 due by December 31, 2008. A bankable feasibility study is to be completed by December 31, 2009. Globex would retain a 2% net metal royalty on all mineral productions as well as a 10% Net Profit Interest after the Company has first recouped out of the Net Profits from operations \$5,000,000 of all monies expended for preproduction costs and/or operating costs.

On December 12, 2006, the Company amended the agreement so that the exploration expenditures of \$1,000,000 due December 31, 2006 is due March 31, 2007.

On November 2, 2007, the Company amended the agreement so that a cash payment of \$300,000 due December 31, 2007 is staged with \$25,000 due December 31, 2007, \$25,000 due March 31, 2008 and \$250,000 due June 30, 2008. As well, exploration expenditures of \$2,000,000 due December 31, 2007 is staged with \$300,000 due March 31, 2008 and \$1,700,000 due December 31, 2008.

5. Mineral Properties and Deferred Exploration Costs (continued)

b) Val d'Or Project (continued)

i) Globex Option (continued)

On April 22, 2008, the Company amended the agreement so that the cash payment of \$250,000 due June 30, 2008 is staged with \$125,000 due December 31, 2008 and \$125,000 due December 31, 2009. In addition, further cash payments of \$75,000 will be due by December 31, 2010 and \$100,000 by December 31, 2011. As well, the remaining exploration expenditures of \$1,700,000 due December 31, 2008, as per the November 2, 2007 amendment, has now been changed to \$700,000 due by December 31, 2008, \$1,000,000 due by December 31, 2009, \$1,500,000 due by December 31, 2010 and \$1,500,000 due by December 31, 2011. As further compensation, the Company agreed to issue an additional 500,000 shares by December 31, 2008, 500,000 shares by December 31, 2009, 500,000 shares by December 31, 2010 and 500,000 shares by December 31, 2011. The bankable feasibility study has been extended to December 31, 2012.

On January 28, 2009, Globex transferred a 2% interest in the 44 claims of the Nordeau Bateman Properties to the Company.

On September 27, 2010 the parties agreed to extend the funding of expenditures of \$1,500,000 due by December 31, 2010 to April 30, 2011, representing a cumulative total of \$4,500,000. All other terms of the agreement remain unchanged. Subsequent to March 31, 2011, the Company fulfilled its obligation.

ii) Manseau Option

On May 31, 2010 The Company allowed the Manseau options to expire. The Company has satisfied all obligations relating to the agreement.

iii) Threegold Option

On November 15, 2010, the Company executed an agreement granting Threegold Resources Inc. the option to earn a 75% interest in Plato's Vauquelin Properties consisting of two properties, known as the Hop O'My Thumb Property with 36 claims and the Vauquelin Property with 17 claims, located in the Townships of Vauquelin in the Province of Quebec.

The Company received an initial payment of \$50,000 upon the execution of the option agreement.

5. Mineral Properties and Deferred Exploration Costs (continued)

b) Val d'Or Project (continued)

iii) Threegold Option (continued)

With respect to the two Properties, to earn its 75% interest Threegold will be required to incur exploration expenditures of \$500,000 on or before the second anniversary of the effective date on the two properties. As well, Threegold will be required to make additional payments to Plato of \$50,000 each on or before the first, second, third, and fourth anniversary of the effective date of the agreement.

In addition, to earn the 75% interest, Threegold must complete and file within six months after the fourth anniversary of the effective date a National Instrument 43-101 compliant mineral resource reports with measured or indicated resource on each of the Properties. Plato will retain a 2% NSR upon the exercise of the option.

iv) Company owned claims by acquisition or staking

As at March 31, 2011, the Company's acquired or staked claims consist of six properties known as Vauquelin, Vauquelin Pershing, Vauquelin Horseshoe, Pershing Denain (with 38 claims subject to a 2% net metal royalty), Hop O'My Thumb (with 2 claims subject to a 2% net smelter royalty), and Vauquelin II, which are located in Vauquelin Township. Collectively these six properties consist of 234 claims totalling 3,823 hectares.

c) Lolita Project

On August 27, 2007, the Company entered into an agreement to acquire a 75% interest in 29,904 hectares known as the Lolita Property in Argentina. The Company is required to incur US\$50,000 in initial expenditures before June 19, 2009. On June 16, 2009 the parties extended this requirement to December 31, 2009. As of December 31, 2009 the initial expenditures of US\$50,000 (CDN\$50,094) had been met in accordance with the agreement.

Upon completion of the initial expenditures, a Joint Work Program for up to US\$500,000 will be jointly developed and be financed 75% by the Company and 25% by the other party. The other party is obliged to fund 25% of the Joint Work Program or have its interest diluted on a pro-rata basis to a carried interest of 2%. The other party will retain a 2% net smelter royalty, which can be bought back by the Company for US\$500,000.

Current expenditures are being funded by both parties in accordance with the agreement and the parties are continuing to develop the Joint Work Program.

Notes to the Financial Statements
For the Three Months Ended March 31, 2011
Unaudited - See Notice to Reader

10. Income Taxes

- a) Deferred income tax expense is recognized based on management's best estimate of the weighted average annual income tax rate expected for the full financial year. The estimated average annual rate used for the year ended December 31, 2010 was 31% and the three months ended March 31, 2011 was 28%.

11. Related Party Transactions

During the three months ended March 31, 2011 the Company:

- a) incurred rent of \$6,000 with a related company. The Company and the related company have an officer in common. This officer is also a director and shareholder of both companies.
- b) incurred consulting fees of \$20,024 with one of the Company's officers. As at March 31, 2011, accounts payable and accrued liabilities included \$8,380 payable to the officer.
- c) incurred consulting fees of \$1,475 with one of the Company's directors.
- d) incurred accounting fees of \$15,050 with an accounting firm in which one of the Company's officers is a partner. As at March 31, 2011, accounts payable and accrued liabilities included \$40,736 payable to this accounting firm.
- e) incurred directors fees of \$5,600. As at March 31, 2011, accounts payable and accrued liabilities included \$65,400.
- f) repaid a \$110,00 advance from a related corporation. The Company and the related corporation have a director in common. This director is also a shareholder and officer of both corporations.

12. Financial Instruments

- a) Fair Value

The Company has designated its cash and cash equivalents at fair value through profit and loss. Other receivables are classified as loans and receivables, which are measured at amortized cost. Accounts payable and accrued liabilities are classified as other financial liabilities, which are measured at amortized cost.

Cash and cash equivalents would be classified as a level 1 item under the fair value hierarchy.

12. Financial Instruments (continued)

b) Liquidity Risk

Liquidity risk refers to the risk that the Company will not be able to meet its financial obligations when they become due. The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities as they become due. As at March 31, 2011, the Company had a cash balance of \$502,869 to settle current liabilities of \$839,670. All of the Company's financial liabilities have contractual maturities of less than 30 days and are subject to normal trade terms.

The Company has no income and relies on equity financing to support its exploration program. Additional financing is required to fund the related operating expenses required to manage the Company through fiscal 2011. Management prepares budgets and ensures funds are available prior to commencement of any exploration program.

c) Credit Risk

Credit risk is the risk of loss associated with a counterparty's inability to fulfil its payment obligations. The Company's credit risk relates to cash and other receivables. Cash is held with a reputable financial institution and is closely monitored by management. Management believes the credit risk with respect to other receivables is not significant.

13. Capital Disclosures

The Company's objective when managing capital is to raise sufficient funds to execute its exploration plan. At March 31, 2011, the Company's capital consists of equity in the amount of \$4,597,564.

The properties in which the Company currently has an interest are in the exploration stage; as such, the Company is dependent on external financing to fund its activities. In order to carry out the planned exploration and pay for administrative costs, the Company will spend its existing working capital and raise additional amounts as needed.

The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain future development of the business. The Company does not have any externally imposed capital requirements.

There were no changes in the Company's approach to capital management during the period ended March 31, 2011.

14. Subsequent Events

Subsequent to March 31, 2011, the Company issued 16,500,000 units at a price of \$0.05 per unit for gross proceeds of \$825,000. Each unit was comprised of one common share and one warrant. Each warrant entitled the holder to acquire one common share at an exercise price of \$0.10 for a period of 24 months from the date of closing.
